Mobile devices have become an essential part of daily life. They allow us to perform all kinds of activities which, on many occasions, involve sensitive information. That's why it is so important that we create **strong passwords** and protect every service that we use as much as possible.

And these services and apps are increasing day by day: social media, email, banking services, subscriptions…

So, what can you do to create and remember all those passwords?

We have the solution for you. With **Panda Dome Passwords,** you will be able to manage all your passwords easily and securely and will never forget a password again.
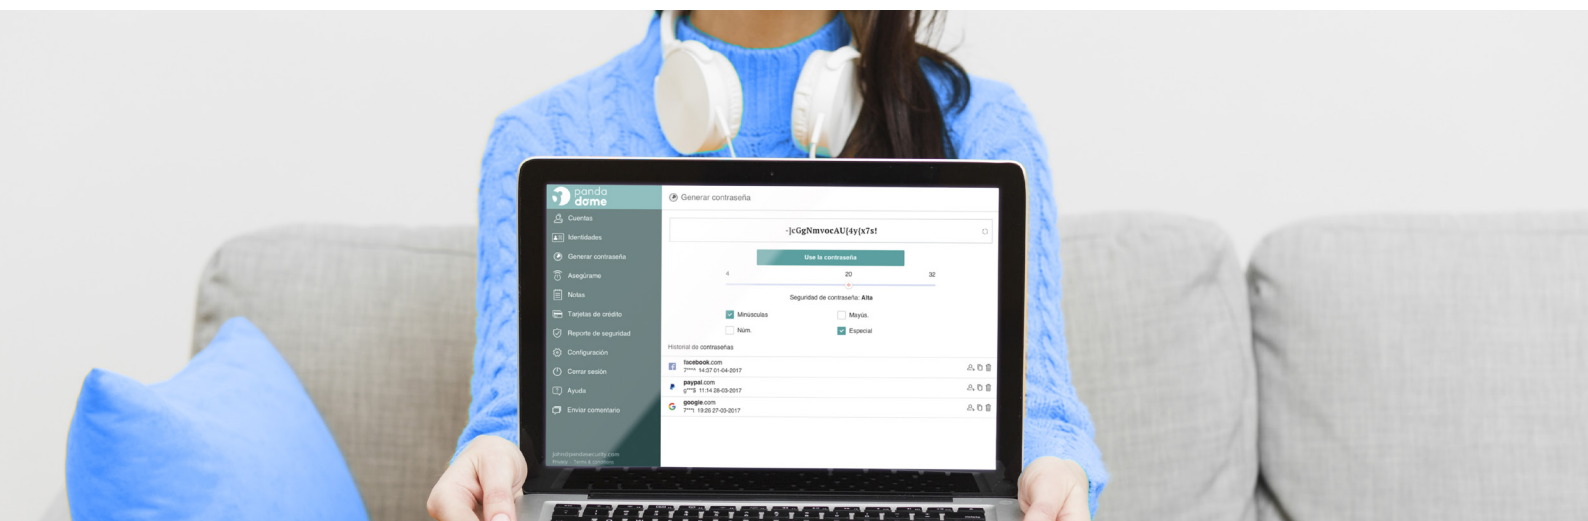

WHAT CAN YOU DO WITH PANDA DOME PASSWORDS?

- Manage all your passwords with a single master key.

- Create strong passwords automatically.

- Fill registration forms automatically with a single click.

- Use Two-Factor Authentication (2FA) to improve security.

- Sync all your passwords and information across all your devices.

- Access all your data and passwords offline and export them if you need them.

- Receive security alerts, tips, and reports.

- Access backup copies of all your passwords.

- Manage your addresses and credit card details easily and securely.

- Access a virtual vault where you can store personal encrypted notes that only you can access using your master password.

- Log out remotely.

- Delete your browsing history and close open tabs remotely.

Plus, remember that you can store as many passwords as you want, as there is no password storage limit.

Panda Dome Password supports Android, iOS, Chrome, and Firefox, and can be used under your account on as many devices as you want, with no limit.

NEED MORE?

Find out why Panda Dome Passwords will make your life easier and more secure

Your passwords always with you
Save your passwords once and access them securely on all your devices. It also has an offline mode so you can access your passwords even without an Internet connection.

Stop filling in the same forms over and over
We'll save you time, energy, and frustration by filling in your details when you wish to sign up to any service. Panda Dome Passwords can be configured to automatically fill in your registration information and your passwords.

Stop using 1234 for everything
With just one click, Panda Dome Passwords will generate a unique, strong password for every service and will automatically enter it for you every time you need it.

Maximum privacy even when you are not there
Panda Dome Passwords includes a feature that allows you to delete your browsing history and close all your web pages and services remotely.

Keep all your secrets safe

Save and store all your personal information securely: your passport number, Wi-Fi password, credit card number, etc. Your notes will be encrypted and inaccessible for anyone else.

We'll alert you

If you are about to save a duplicate password or haven't changed your password in a long time, we'll let you know and help you resolve it. Additionally, we monitor millions of services in real time and, if any of them is compromised, we'll alert you immediately so you can update your passwords.

Double your security

We recommend you enable Two-Factor Authentication (or 2FA) for enhanced security. But remember, to use it you'll need to have your smartphone always on hand ;-)

Keep your credit card in your pocket

With Panda Dome Passwords, you'll be able to enter your credit card details automatically when you shop online. Much faster, easier, and more secure.

Panda Dome Passwords is compatible with:

Android™

iOS®

Chrome®

Firefox®

Android 4.4 or later.

iOS 9 or later.

Switch to Panda Dome Passwords

And start managing your passwords and storing your personal information securely
